

Contents

Chapter 1 Basic rule

1.1 Preface

- 1.1.1 Purpose 1
- 1.1.2 Usage of this standard 1

1.2 Basic matters of maintenance

- 1.2.1 Application 2
- 1.2.2 System of maintenance 2
- 1.2.3 Classification of inspection 3
- 1.2.4 Objects and items of inspection 6

Chapter 2 Inspection points

2.1 SI devices

- 2.1.1 Isolator 8
- 2.1.2 Damper 12

2.2 Fireproofing

- 2.2.1 Fireproofing for isolators 14

2.3 SI layer

- 2.3.1 Clearance of building and retaining wall 14
- 2.3.2 Condition of SI layer 15
- 2.3.3 Position of the building 16

2.4 Piping for equipment and electrical wiring

- 2.4.1 Piping for equipment and flexible pipe joints 16
- 2.4.2 Electrical wiring 17

2.5 Periphery of the building

- 2.5.1 Obstacles 17

2.6 Others

- 2.6.1 Notice board indicating SI building 17
- 2.6.2 Tracer of displacement 17

Chapter 3 Commentary

3.1 Clearance

- 3.1.1 Significance of clearance 18
- 3.1.2 Classification of clearance 18
- 3.1.3 Horizontal clearance 18
- 3.1.4 Vertical clearance 19
- 3.1.5 Clearance of piping for equipment and of electrical wiring 20

3.2 An example of detailed inspection for steel damper

- 3.2.1 Steel damper 21

3.3 Fireproofing

3.3.1	Deviation of fireproofing system	21
3.3.2	Measurement of the amount of the deviation	22
